New Creative Markets: 10x10 Exhibition Programme 2013

10x10 will be a fast moving, 10 week programme of exhibitions and events that presents ten projects by ten artists / photographers on Four Corners New Creative Markets programme. Six exhibitions will be marked by private views and special events.

Artworks will be wall based, installation, slideshows and screenings, accompanied by talks, performances, book and newspaper promotions. These include finished works and work in progress.

The programme avoids the group show format into which emerging artists / photographers are so often placed, and instead gives participants a more autonomous space.

The wide-ranging works will start to build a multi-faceted portrait of the work produced by Four Corners NCM participants. It will also offer opportunities to foster exchange between artists / photographers and between artists and the public.
